

The logo for webet features a stylized double-headed arrow icon composed of two horizontal bars, one blue and one green, pointing in opposite directions. To the right of the icon, the word "webet" is written in a large, lowercase, sans-serif font.

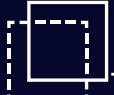

1.intro

WEBET is a decentralized peer-to-peer betting and prediction market platform built on blockchain, focused on three central values:

FAIRNESS, Webet will never participate in the marketplace, so it never has neither the ability nor the will to influence it.

TRANSPARENCY, Webet will be running smart contracts on a blockchain, meaning transactions are public, and all the remaining code will be available for anyone to audit.

FREEDOM, Webet will be open for any users to share their opinions on the marketplace, without any fees or mandatory subscriptions.

2.the problem

CRYPTOMARKETS VOLATILITY

Since crypto is so volatile, their derivatives have a higher risk than traditional markets, making Webet a solution for hedging and risk management.

ARGUMENT SETTLEMENT

If you are a trader, you've probably come across multiple social media groups, with many discussions due to divergent opinions.

You can find claims such as Cardano is going to surpass Ethereum market cap. Gold will perform better than Amazon stock, etc. And there's no direct way to bet, and you can just short or long. Webet offers a unique way to settle these bets directly.

BETTING

Nowadays, online gambling platforms are the market makers, controlling the odds. You are playing against the house instead of playing against other players. Bookmakers need to be profitable, so the odds have to be on their side. Consequently, they take huge fees of your bets.

4.use cases

4.1. Financial Instruments

Prediction markets can enable the creation of financial instruments that track stock price or commodity value with greater specificity than existing derivatives. If we conceptualize traditional financial instruments as expressions of economic value. Prediction markets enable more nuanced and specific expressions about economic events, which in turn signal value more explicitly at both the macro and micro-economic levels.

4.2. Settle Disputes

All the data available on webet will be used to forecast future events. Prediction markets have been used to accurately predict political contests, sporting events, and economic outcomes.

4.3. Information Gathering

All the data available on webet will be used to forecast future events. Prediction markets have been used to accurately predict political contests, sporting events, and economic outcomes.

4.4. Hedging and Risk Management

Since you're playing directly against other users, many unique opportunities to hedge will be available on webet. If you enter the market at the right time, you might be able to always profit.

Example

Bitcoin Price is 60k. User finds prediction market: Bitcoin will be traded under 48k until 22nd April. With shares 0.7(no)/0.3(yes) and buys 1000 yes shares for 300\$. The same user also opens a 10x leveraged short position on BTC of 300\$.

Total of investment:1000\$

SCENARIO A:

PRICE TRADES LOWER THAN 48K

The user loses 700\$ on webet and gets profit \geq 200% on his short leveraged position

SCENARIO B: PRICE TRADES BETWEEN 48K AND 66K

The user gets 1000\$ from webet and still has from -100%>profit/loss>200% on his leveraged position.

SCENARIO C:

PRICE TRADES ABOVE 66K

The user gets liquidated on his leveraged position that it's covered by his 1000\$ on webet

RESULT | >-100\$

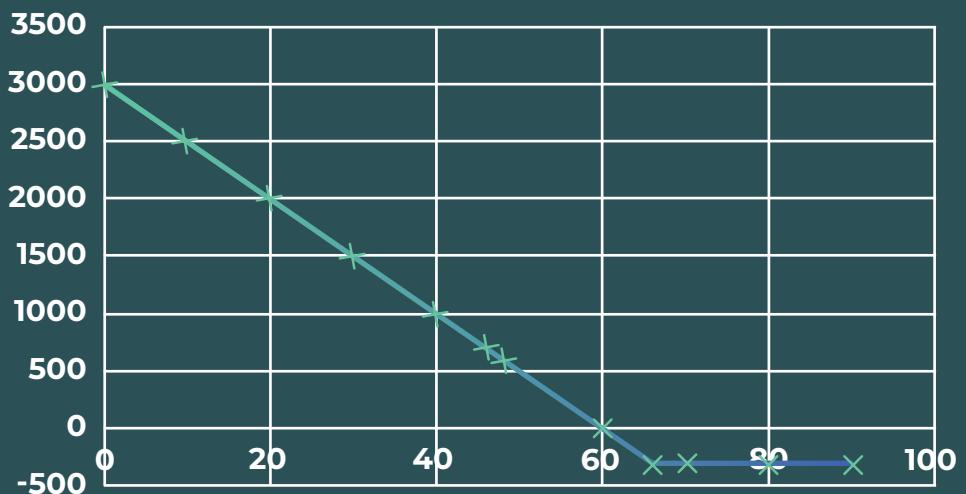

RESULT | PROFIT (0\$>600\$)

RESULT | LOSS (0\$)

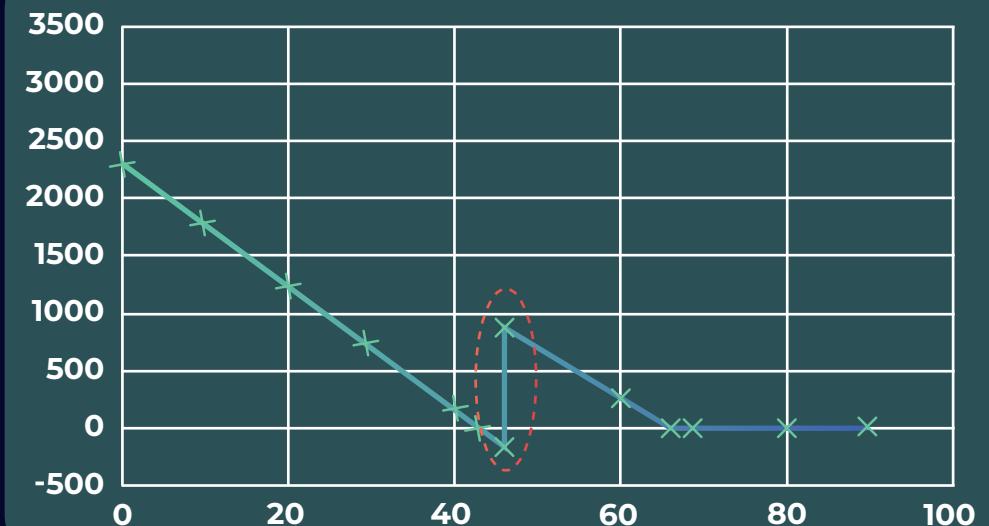

Here's how this bet looks like with and without webet

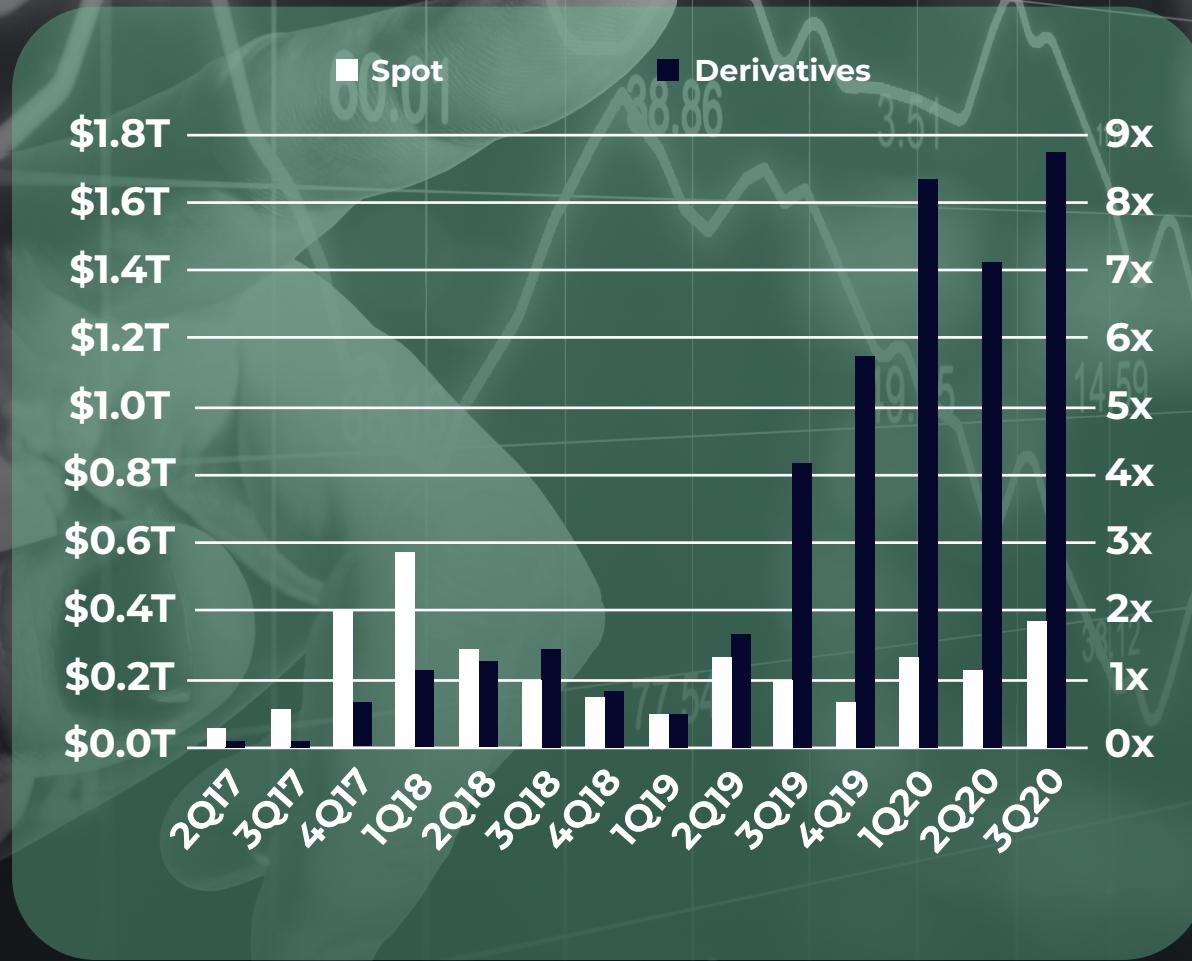

Profit without WEBET

Profit with WEBET

5. quick market figures

From Q2 2017 to Q1 2018, spot volume rose sharply from a low of roughly \$ 58 billion to a high of \$ 570 billion from there derivatives have completely replaced the spot as the dominant market, while spot volumes have failed to make a full recovery. Derivatives notional volume exploded from below \$ 6 billion in Q2 2017 to over \$ 1700 billion by Q3 2020. (Kraken,2020) Consequently, making derivatives the primary responsibility for crypto price discovery.

5. competitive advantage

There is no option to hedge against traditional markets, no simple way for the average user to enter these markets and there are no custom markets.

1. LIQUID AND CURATED MARKETS
2. SIMPLE UI/UX
3. STACKING INCENTIVES
(DEFI, YIELD FARMING)
4. FAIREST DISTRIBUTION
REWARD MODEL
5. DECENTRALIZED ORACLE
6. MARKETS CREATED
BY THE COMMUNITY

COMPETITION

1. LACK OF LIQUIDITY
AND REPEATED MARKETS
2. COMPLICATED OR RAW
USER EXPERIENCE
3. NO INCENTIVES
4. UNFAIR DISTRIBUTION
5. CENTRALIZED ORACLES
- 6 - MARKETS CREATED
BY THE PLATFORM OWNERS

6. token

6.1. token utility

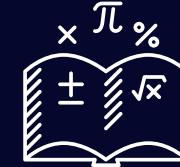

UTILITY NFT'S

(extra rewards for
webet NFT owners)

PREMIUM MARKETS

(restricted access)

STATISTICAL ADD-ONS

(curated statistics)

LIQUIDITY POOLS*
(earn extra WEBT)

GOVERNANCE

(decide with the community)

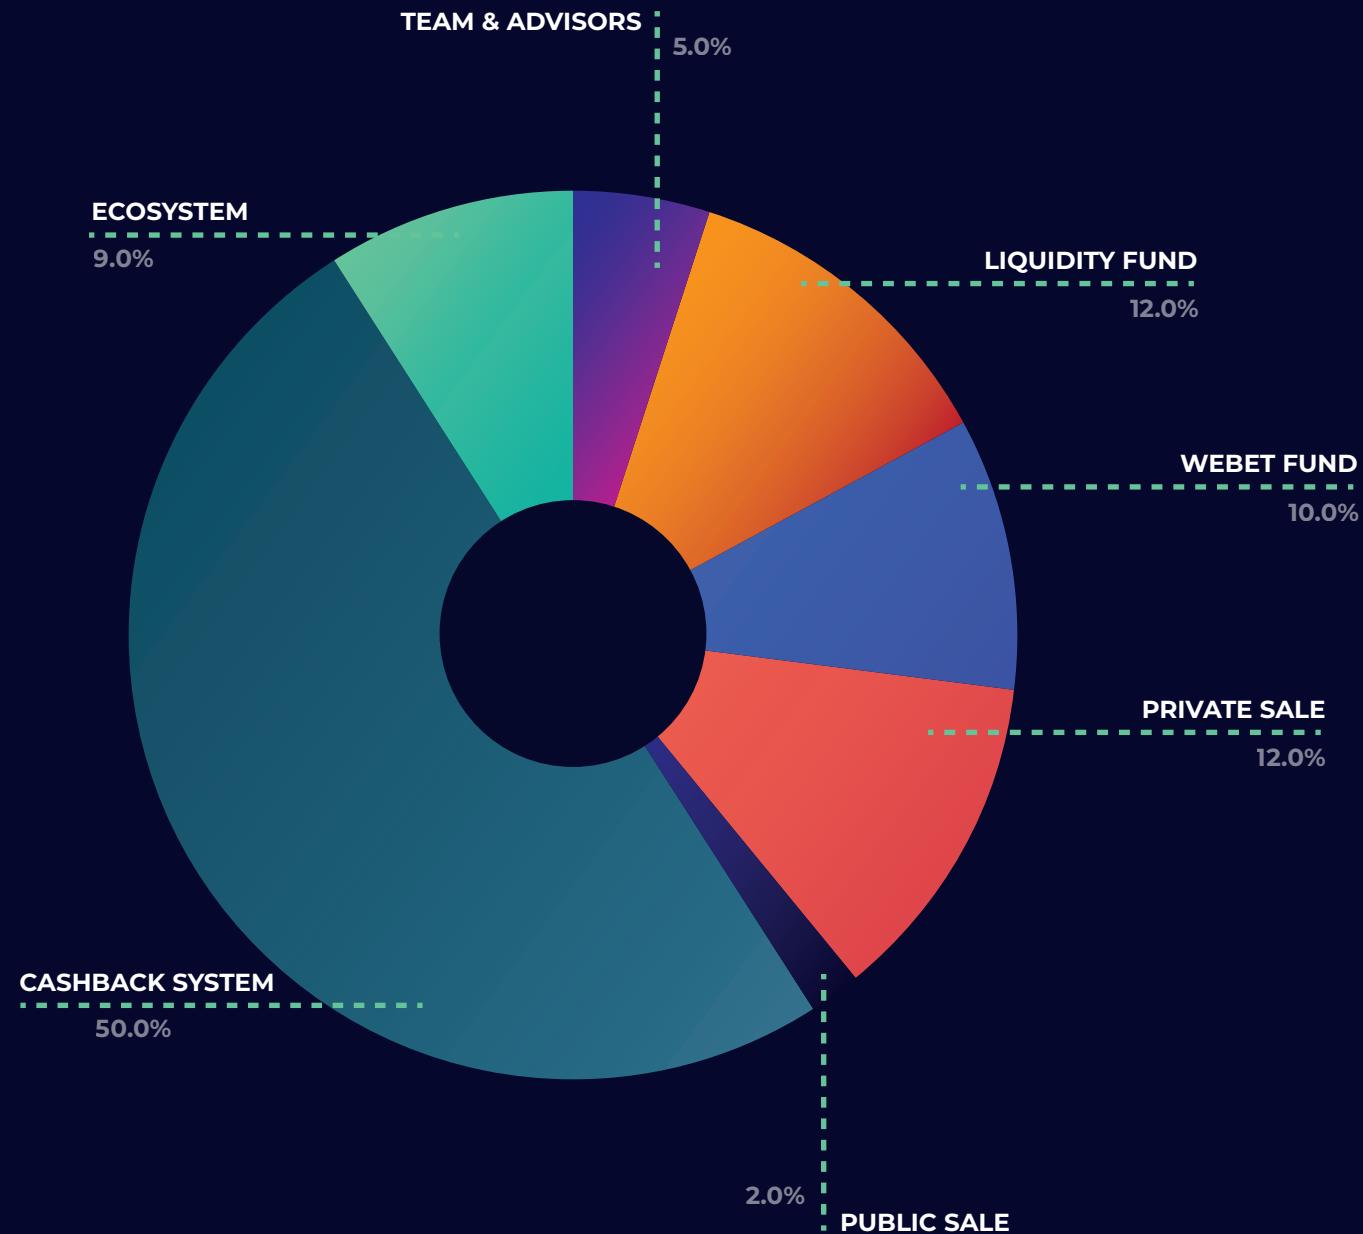

CUSTOM MARKET CREATION

(you need WEBT tokens
to create new markets)

*RE-BUY, of the fees generated will be used to re-buy the token to pay liquidity providers,
raising the price and creating yield farming possibilities

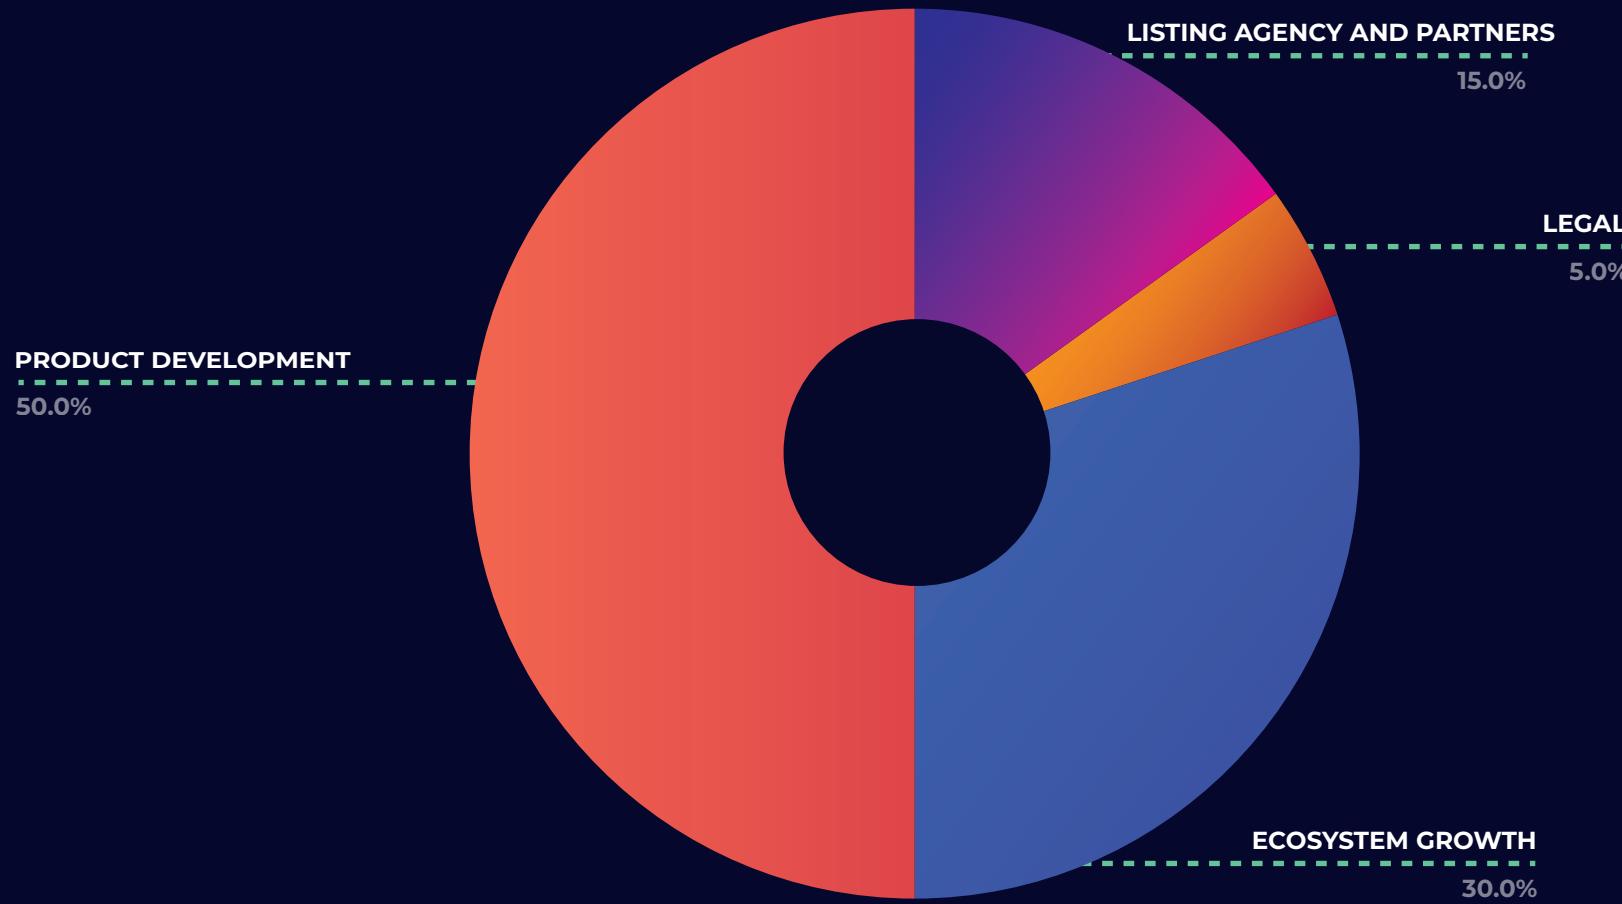

6.2. Token Partition

WEBET FUND

6.3 Token Release Schedule

Token Partition	Token Release Schedule
Team & Advisors	Fully Locked for 9 months, then 10% released every month over 10 months
Liquidity Fund	20% on TGE, then 10 percent released every month over 8 months
Webet Fund	10% on TGE, then 10% released every month over 9 months
Private Sale	20% on TGE, then 20% released every month over 4 months
Public Sale	Fully unlocked
Cashback System	TGE depending on users bets
Ecosystem	20% on TGE, then 5% released every month over 16 months

Everytime the token is used on our platform there is a 5% burn

7. roadmap

Q2

2021
PoC, Business Plan

Q4

2021 ERC721 integration,
Go to marketing strategy

Q3

2021 Communities creation,
IDO, Platform Beta Launch

2022

Platform Launch
implementing of forex,
stocks and commodities markets,
governance, APP launch,
expand to other prediction markets
